Email address:

ExEL- Purpose and Objectives

The purpose of this project is to teach local scientific engagement and service in the venue of planned experiential-learning activities. Students will engage in supervised career-exploration and discipline-related activities in the community service setting. Experiential Education and Learning activities will be employed to assess the student experience and to examine how marine science organizations within the community address marine science related problems, issues and concerns of the community.

Objectives: At the completion of this course, students will be able to reflect a personal and more professional understanding of marine science contributions within their local community; recognize the marine science related problems that are encountered in communities as a whole, and how they are addressed through private, government, academic and or volunteer organizations that provide ExEL opportunities.

Community Partner/Sponsor mission:

Purpose of the project:

Specific tasks involved in the project:

Student: I agree to:

- Perform my respected duties to the best of my ability.
- Adhere to organizational rules and procedures, including record-keeping requirements and confidentiality of organization and client information.
- Model professional, ethical and appropriate behavior, and meet confidentiality requirements of the organization with which I am working.
- Meet time and duty commitments or if I cannot attend, to provide 24 hours' notice to the site supervisor or coordinator so that alternative arrangements can be made.

Supervisor: I agree to:

- Provide adequate information and training for the service-learner including information about the organization's mission, clientele and operational procedures.
- Provide appropriate supervision to the experiential-learner and provide feedback on performance.
- Provide meaningful tasks related to skills, interests, and available time.
- Provide appreciation and recognition of the ExEL - learner's contribution.
